

GENERAL REMARKS

1. The structures are indicated by double number, the first part of which indicates the chart in which it occurs and the second part indicates the serial number of the structure. e.g. (2.3) means structure 3 in chart 2.
2. IR spectra were recorded in chloroform, as KBr pellet or a liquid film.
3. PMR spectra were recorded in CDCl_3 with tetramethylsilane (TMS) as an internal reference. The chemical shifts (δ values) are reported in ppm.
4. The melting points and boiling points are uncorrected.
