

IV

GENERAL REMARKS

1. The structures are indicated by a double number, the first part of which indicates the chart in which it occurs and the second part indicates the serial number of the reaction or structure, e.g. (2.1) means structure 1 in Chart-2.
2. The spectra concerning each chapter are given at the end of the Experimental part.
3. IR spectra were recorded in nujol ~~or KBr pellet~~ or as a liquid film. The values reported are in cm^{-1} .
4. ^1H -NMR spectra were recorded in CDCl_3 (unless indicated otherwise) with tetramethylsilane (TMS) as an internal reference. The chemical shifts (δ values) are reported in ppm.
5. The melting points are uncorrected.
