

LIST OF GRAPHS

Sr. No.	Contents
1	Physico – chemical parameters of water
2	Glycogen content in Hepatopancreas and Gonads of the mussel, <i>Lamellidens marginalis</i> exposed to various concentrations of Lead (Pb) and Calcium (Ca++) for 8 days
3	Protein content in Hepatopancreas and Gonads of the mussel, <i>Lamellidens marginalis</i> exposed to various concentrations of Lead (Pb) and Calcium (Ca++) for 8 days
4	Acid Phosphatase activity in Hepatopancreas and Gonads of the mussel, <i>Lamellidens marginalis</i> exposed to various concentrations of Lead (Pb) and Calcium (Ca++) for 8 days
5	Alkaline Phosphatase activity in Hepatopancreas and Gonads of the mussel, <i>Lamellidens marginalis</i> exposed to various concentrations of Lead (Pb) and Calcium (Ca++) for 8 days
6	Glycogen content in Hepatopancreas and Gonads of the mussel, <i>Lamellidens marginalis</i> exposed to various concentrations of Lead (Pb) and Calcium (Ca++) for 16 days
7	Protein content in Hepatopancreas and Gonads of the mussel, <i>Lamellidens marginalis</i> exposed to various concentrations of Lead (Pb) and Calcium (Ca++) for 16 days
8	Acid phosphatase activity in Hepatopancreas and Gonads of the mussel, <i>Lamellidens marginalis</i> exposed to various concentrations of Lead (Pb) and Calcium (Ca++) for 16 days
9	Alkaline Phosphatase activity in Hepatopancreas and Gonads of the mussel, <i>Lamellidens marginalis</i> exposed to various concentrations of Lead (Pb) and Calcium (Ca++) for 8 days
10	Accumulation of Lead (Pb) in the Hepatopancreas and Gonads of the

	mussel, <i>Lamellidens marginalis</i> exposed 8 days.
11	Accumulation of Lead (Pb) in the Hepatopancreas and Gonads of the mussel, <i>Lamellidens marginalis</i> exposed 16 days.
12	Accumulation of Calcium (Ca ⁺⁺) in the Hepatopancreas and Gonads of the mussel, <i>Lamellidens marginalis</i> exposed 8 days.
13	Accumulation of Calcium (Ca ⁺⁺) in the Hepatopancreas and Gonads of the mussel, <i>Lamellidens marginalis</i> exposed 16 days
