

ACKNOWLEDGEMENT

"The quality of a nation depends upon the quality of its citizens. The quality of its citizens depends-not exclusively but in critical measure-upon the quality of their education. The quality of their education depends more than upon any other single factor, upon the quality of their teacher". The teacher is the living ideal, the fountain-head of knowledge and the potential guide to provide directive for the growth and development of students of today as worthy citizens of tomorrow. To put it in a nutshell, the teacher is the backbone of the educational system, the marker of mankind and the architect of the society. I am conscious of the fact that nothing comes from nothing and that fulfilled prayers and blessing are the results of divine invention on their own, not even the hardest human effort can bring about complete success and occasional miracles. So, I take this opportunity to express my deep sense of gratitude to my learned, highly capable and tireless teacher and guide Prof. T. V.
