

PREFACE

It is a micro study of engineering units operating in Kolhapur. It is based on the survey of 14 large and 35 small units which were selected at random.

The main object of this study was to highlight the pattern and the problems of small and large engineering units, so that the possibilities of diversification, institutional --- finance, marketing could be explored for the benefit of ----- engineering units.

The study has been undertaken against the background of the agricultural physical and economic aspects in Kolhapur district.

The study reveals enormous potentialities for ----- engineering units, They must be exploited properly.

I am thankful to the Shivaji University authorities for sanctioning me a grant under ' Teachers aid for research --- fund ' for undertaking this project.

I thank Dr. V.B.Ghuge, Head of the Dept. of Economics,
for his suggestions on important points.

I would like to mention here the co-operation given by
Dr. V.S.Shitole, Research Assistant in the department and also
University library, District statistical officer, Industrialists
and Technicians, in Kolhapur.

1978
Kolhapur.

M. S. B. Pandit
Mrs. S.B.Pandit.
Department of Economics.
