## CHAPTER I

### INTRODUCTION

1.1	Solutions in Water.	1
1.2	Mixed aqueous solvent systems.	12
1.3	Solutions of electrolytes in non-aqueous solvent systems.	19
1.4	Ternary systems.	20
1.5	Present work.	22

## CHAPTER II

### EXPERIMENTAL

2.1.1	Technique of sound velocity measurement.	26
2.1.2	Measurements of sound velocity.	29
2.1.3	Accuracy and precision of measured sound velocities in the present work.	31
2.2.1	Measurement of density.	35
2.2.2	Experimental procedure.	35
2.2.3	Calculation of A and B constants and calibration of the "PAAR DMA 602" densimeter.	37
2.2.4	Accuracy of the instrument.	39
2.3	Chemicals used.	41

## CHAPTER III

### RESULTS AND CALCULATIONS OF DERIVED PARAMETERS

3.1	Electrolytes in water.	43
3.2	Non-electrolytes in water.	48
3.3	Electrolytes in mixed aqueous solvents.	48

## CHAPTER IV

DISCUSSION	82
------------	----

## CHAPTER V
