

GENERAL REMARKS

1. The structures are indicated by a double number, the first part of which indicates the chart in which it occurs and the second part indicates the serial number of structure.
E.g. : (2.1) means structure 1 in chart-2.
2. The spectra concerning each chapter are given just before the experimental part.
- 3.a) The PMR spectra were recorded in CDCl_3 or CCl_4 with TMS as an internal reference; on Perkin Elmer R--32 (90 MHz), FX 90Q FT NMR Spectrophotometers.
b) The chemical shifts are expressed in PPM (δ - units)
4. The IR Spectra were recorded in nujal as a KBr pellet or as a liquid film; on Perkin Elmer - 783 spectrophotometers.
5. The melting points (M.P.) and boiling points (B.P.) are uncorrected.
6. The ether extracts were dried with anhydrous sodium sulphate, unless otherwise mentioned.
7. The temperatures are expressed in degrees celcius.
