DETAILED ANALYSIS AND INTERPRETATION OF COLLECTING DATA

140

Information about 100 workers working in several departments of the factory is given below. The information is put in the analytical tables based on age, sex, caste, education and many other things. These tables helps to look into the conditions and different aspects of the life of the workers in Sangamner Bhag Sahakari Sakhar Karkhana Ltd., Sangamner.

The information is mainly collected from the questionnaires which were issued to these workers as well as from informal interview.

(1) <u>Sex</u> :-

The Researcher being a woman, had great interests in collecting the information about the women employees working in the factory but in this factory there are women employees.

(2) Religion and Caste :-

Seasonal workers working in Sangammer Bhag Sahakari Sakhar Karkhana Ltd., belong to different castes. Table No. 2.8 shows Castewise distribution of the workers:

Table No. 2.8 shows that majority is of the Maratha workers. Out of 107 workers, 57 workers are Maratha. That means 53.27%.

- 142 -

After that the percentage of Mahar(Hindu) is 15.89%. And below that the percentage of Dhangar is 5.6% and Mali 4.68%. Other backward classes such as Muslim, Nirali, Wanjari, Koli, Gurao and are only 1.87% and Bil, Chambhar, Sutar is 0.94%.

Factory is situated in rurar area. In this rural area, the Maratha community is more than others., and therefore the majority of Maratha is there.

(9) Division of respondents according to seasonal permanent and Seasonal temporary :-

150 -

In this factory, workers are classified as Seasonal and permanent. But again seasonal workers are classified as Seasonal permanent and Seasonal temporary. Seasonal permanent workers get the retention allowance in off season. But seasonal temporary workers do not get the retention allowance in off season and even their no job security for them as there is no guarantee that they will get job in the next season.

Division of Seasonal Workers as Seasonal Permanent and Seasonal Temporary are as under : Table No. 3.6 Sr.No. Type of Respondent No. of Respondents Percentages. 1. Seasonal Permanent 83 77.57 2. Seasonal Temporary 24 22.43 107 100%

Table No. 3.6 shows that nearly 24 of the Seasonal workers are working as Seasonal Temporary means many a times they are working as and on monthly wages. Many such workers are working in the same Factory continuously for more than 5 to 6 years and still they are working as Seasonal Temporary. This fact is thinkable.
