

PREFACE

Secondary School education aims at developing democratic citizenship, improving vocational efficiency, developing personality and educating children for leadership. Management of Secondary School is directly concerned with a maximum utilisation of physical, human and financial resources. The study of management of Secondary Schools is a challenging but neglected subject. Some research work has been done in the fields of education and psychology. However hardly any study has tried to analyse the managerial aspects of the Secondary Schools. The present study purports to fill this gap by undertaking a study of management of secondary Schools in Wai Taluka.

I sincerely acknowledged my indebtedness to my guide, Dr. K.V. Bachute, without whose valuable guidance and constant encouragement, this work would not have been possible. It was he who inspired me to complete this work.

I express my sincere gratitude to Dr. J.S. Chaudhari, the Head of the Department of Commerce and Management, and all the Staff members of my College for their guidance and co-operation during the course of my research study.
