§	Orientation and Purpose of the problem -----	1
§	Plan of work -----	3

CHAPTER-I

Thin Film Deposition and Characterization Techniques

1.1	Introduction -----	5
-----	--------------------	---

Section (A): Thin film Deposition Technique

1.2.	1.2. (A) 1.	Introduction -----	5
	1.2. (A) 2.	Advanced Spray Pyrolysis Set-up -----	8
	1.2. (A) 1.	Working of Advanced Spray Pyrolysis Technique -----	9
	1.2. (A) 4.	Important parameters -----	11
	1.2. (A) 5.	Shortcomings -----	13

Section (B): Thin film Characterization Techniques

1.3	1.1. (B) 1.	Introduction -----	13
		Differential Thermal Analysis and Thermo Gravimetric	
	1.1. (B) 2.	Analysis -----	14
	1.1. (B) 1.	Thickness Measurement -----	16
	1.1. (B) 4.	X-Ray Diffraction -----	18
	1.1. (B) 5.	Scanning Electron Microscopy (SEM) -----	21
	1.1. (B) 5.	Atomic Force Microscopy (AFM) -----	25
	1.1. (B) 7.	Optical Absorption Studies -----	27
	1.1. (B) 9.	Electrical Resistivity Measurement -----	29
	1.1. (B) 10.	Gas Sensing Measurement Assembly -----	31
		References -----	33

CHAPTER-II

Effect of Preparative Parameters on Structural, Morphological, Electrical and Optical Properties of Nanocrystalline ZnO Thin Films

2.1	Introduction -----	35
2.2	Experimental Details -----	35
2.2.1	Substrate Cleaning -----	36
2.2.2	TGA-DTA analysis of Zinc Acetate -----	36
2.2.3	Deposition of Zinc Oxide Thin Films -----	38
2.2.4	Characterization Techniques -----	39
2.3	Results and Discussion -----	40

Section (A): Effect of Core Temperature (reaction chamber temperature)

2.3. (A) 1.	X-ray Diffraction Studies -----	40
2.3. (A) 2.	Surface Morphology -----	42
2.3.(A) 2.1	Field Emission Scanning Electron Micrograph (FESEM) Study -----	42
2.3.(A) 2.2	Atomic Force Micrograph (AFM) Study --	45
2.3. (A) 3.	Electrical Resistivity -----	46
2.3. (A) 2.	Optical Absorption Studies -----	48

Section (B): Effect of substrate Temperature

2.3. (B) 1.	X-ray Diffraction Studies -----	51
2.3. (B) 2.	Surface Morphology -----	53
2.3.(B) 2.1	Field Emission Scanning Electron Micrograph (FESEM) Study -----	53
2.3.(B) 2.2	Atomic Force Micrograph (AFM) Study --	55
2.3. (B) 3.	Electrical Resistivity -----	56
2.3. (B) 2.	Optical Absorption Studies -----	57

Section (C): Effect of ZnO film thickness	
2.3. (C) 1. Surface Morphology -----	59
2.3.(C) 1.1 Scanning Electron Micrograph (SEM) Study	59
2.3.(C) 1.2 Atomic Force Micrograph (AFM) Study --	62
2.3. (C) 2. X-ray Diffraction Studies -----	63
2.3. (C) 3. Electrical Resistivity -----	65
2.3. (C) 2. Optical Absorption Studies -----	67

Section (D): Effect of Layer by Layer [LBL] Deposition	
2.3. (D) 1. X-ray Diffraction Studies -----	69
2.3. (D) 2. Surface Morphology -----	71
2.3.(D) 2.1 Field Emission Scanning Electron Micrograph (FESEM) Study -----	71
2.3.(D) 2.2 Atomic Force Micrograph (AFM) Study --	74
2.3. (D) 3. Electrical Resistivity -----	75
2.3. (D) 2. Optical Absorption Studies -----	76
References -----	78

CHAPTER-III Synthesis of Copper Doped Nanocrystalline ZnO Thin Films and its Influence on Physical Properties

3.1 Introduction -----	81
3.2 Experimental Details -----	82
3.2.1 Substrate Cleaning -----	82
3.2.2 Deposition of Copper Doped Zinc Oxide Thin Films ----	82
3.2.3 Characterization Techniques -----	83
5.3 Results and Discussion -----	83

3.3.1	X-ray Diffraction Studies -----	83
3.3.2	Surface Morphology -----	85
5.3.2.1	Field Emission Scanning Electron Micrograph (FESEM) Study -----	85
5.3.2.2	Atomic Force Micrograph (AFM) Study -----	86
3.3.3	Optical Absorption Studies -----	87
	References -----	89

CHAPTER-IV

Synthesis of Tin Doped Nanocrystalline ZnO Thin Films and its Influence on Physical Properties

3.1	Introduction -----	91
3.2	Experimental Details -----	92
3.2.1	Substrate Cleaning -----	92
3.2.2	Deposition of Tin Doped Zinc Oxide Thin Films -----	92
3.2.3	Characterization Techniques -----	93
3.3	Results and Discussion -----	93
3.3.1	X-ray Diffraction Studies -----	93
3.3.2	Surface Morphology -----	95
3.3.2.1	Field Emission Scanning Electron Micrograph (FESEM) Study -----	95
3.3.2.2	Atomic Force Micrograph (AFM) Study -----	97
3.3.3	Optical Absorption Studies -----	98
	References -----	100

CHAPTER-V

Performance of H₂S Sensors Based on Undoped and Doped Zinc Oxide Thin Films

5.1	Introduction -----	101
5.2	Experimental Setup of Gas Sensor study-----	102
5.3	Results and Discussion -----	103
5.3.1	The H ₂ S Sensing Properties of ZnO Thin Films Prepared at different core temperatures -----	103
5.3.2	The H ₂ S Sensing Properties of ZnO Thin Films Prepared At Different Substrate Temperatures -----	108
5.3.3	The H ₂ S Sensing Properties of ZnO Thin Films Prepared At Different Thicknesses -----	110
5.3.4	The H ₂ S Sensing Properties of ZnO Thin Films Prepared By Layer By Layer (LBL) Deposition -----	112
5.3.5	The H ₂ S Sensing Properties of ZnO: Cu (CZO) Thin Films -----	114
5.3.6	The H ₂ S Sensing Properties of ZnO: Sn (SZO) Thin Films -----	117
	References -----	122

CHAPTER-VI

Summary and Conclusions
